

**BOHINJSKO
FROM BOHINJ**

Znak BOHINJSKO/FROM BOHINJ zagotavlja geografsko poreklo in visoko kakovost proizvodov in storitev.

Skrivosten Slap Savica je vkljenen v prepadne stene Komarče, in dobiva vodo iz 500m višje ležečih Triglavskih jezer. Poleti, ob jutranji zarji, ko se prvi sončni žarki dotaknejo padajočega pramena vode, se ob slapu naredi prečudovita mavrica, po močnem deževju pa postane slap Savica za kratek čas visok skoraj 600 m.

Do slapu v zavetju gozda vodi steza s 553 stopnicami, zato vas za zaključek sprehoda vabimo da obudite spomine ob lahki, okusni skutni sladici »Savica«, sladkani z bohinjским medom in obogateni z lešniki in gozdnimi sadeži.

BOHINJSKO FROM BOHINJ

The Bohinj/From Bohinj certificate guarantees the geographical origin and high quality of products and services.

The mysterious Savica Waterfall lies deep in the walls of Komarča, and its water springs from the Triglav lakes that are located 500m higher. In the morning dawn in summer, when the sun's first rays touch the falling water, a magnificent rainbow emerges, and after heavy rainfall the Savica Waterfall reaches almost 600m in height.

A path including 553 steps leads through the forest to the waterfall. At the end of your walk we invite you to relax and enjoy our culinary specialty, a light and tasty cottage cheese dessert called "Savica", sweetened with Bohinj honey and enriched with hazelnuts and forest fruits.
